

Maintaining Concrete and Cement Screed Floors

Just like any surface, terrazzo and concrete floors need regular maintenance. The right maintenance products and system ensures the surface retains its beauty and finish for many years. The following method is easy and quick to implement as well as economical. This method leads to optimal cleaning and maintenance results on polished and honed surfaces.

Protection

Your surface has been sealed with Lithofin MN Stain-Stop or Lithofin STAINSTOP PLUS. The following maintenance instructions help retain the surface finish and supports the performance and longevity of the applied Lithofin impregnating sealer.

Regular Maintenance

Lithofin MN Easy-Care cleans and maintains terrazzo, concrete and cement screed as well as natural stone in one easy operation. This highly concentrated special maintenance product does not leach out the stone or build up layers. With continued use, the stone will become slightly darker and richer in colour and appearance.

Directions for commercial surfaces:

Required equipment

- Auto scrubber of appropriate size with nylon bristles (bristle 0, approx. 0.5mm)
- Suction rate of approx. 98%
- Micro-Fibre mop and bucket for corners and other difficult to reach areas.
- Maintenance Product: Lithofin MN Easy-Care.

Directions for Use

1. Use 20 ml of Lithofin MN Easy-Care per 10 litres of lukewarm water.
2. Adjust the auto scrubber to use approx. 10 litres of cleaning solution per 100 m².
3. Dirtier areas should be covered twice without the product drying in between passes.
4. Allow the machine to run at its own speed, do not push.
5. Maintenance cleaning should be carried out daily.
6. Note: to remove accumulated and stubborn dirt or for periodic cleaning, use Lithofin MN Power-Clean.

Directions residential surfaces:

Required equipment

- Micro-Fibre mop and bucket
- Maintenance Product: Lithofin MN Easy-Care.

Directions for Use

1. Use 20 ml of Lithofin MN Easy-Care per 10 litres of

lukewarm water.

2. Wipe the surface in a figure eight motion, regularly rinse the micro-fibre mop while changing the water as required.
3. Dirtier areas should be covered twice without the product drying in between passes.
4. Maintenance cleaning should be carried regularly.
5. Please follow the application instructions on the product label.
6. Note: to remove accumulated and stubborn dirt or for periodic cleaning, use Lithofin MN Power-Clean.

Cleaning and refurbishing old surfaces

Use Lithofin MN Power-Clean to thoroughly clean old or very dirty surfaces.

- ➔ Depending on the degree of dirt, dilute Lithofin MN Power-Clean up to 1:3 with water. Apply with a scrubber or cloth and allow to work for 5 to 10 minutes.
- ➔ Brush well (with a scrubber or scrubbing machine) and wait another 5 minutes.
- ➔ Continue to scrub while adding water. Remove from the surface with a cloth or a wet-and-dry vacuum.
- ➔ Rinse well with clear water in order to remove all product residues.

Other, stubborn types of dirt

Oil, grease, care products	Lithofin MN Power-Clean
Tar, wax, varnish, paint	Lithofin WAX-OFF
Deep oil stains	Lithofin OIL-EX
Calcium deposits	Lithofin MN Power-Clean
Rust stains	Lithofin Rust-EX
Shower recess	Lithofin MN Bathroom Cleaner

Please Note:

- △ Wipe up any spills immediately.
- △ Follow the detailed instructions on the labels.
- △ Do not use leaching and degreasing cleaners.

△ This information provides general guidelines. The products must be used according to local conditions and materials. Instructions must be read carefully and followed closely. Where no previous experience is available, or in cases of doubt, test the product in an inconspicuous area. (AU5.19gps)
